ODORCIDE®

210 CONCENTRATE

CAT ATTACK

Not a mask. Not an enzyme.

Background

Eliminates serious odors originating from pet/human urine, feces and decaying organic matter. Material that can be extremely offensive and difficult to eliminate. Odorcide Cat Attack works through a process of counteraction and absorption to safely, but effectively eliminate the malodor. Sold in concentrate form it can be used in carpet cleaning systems and a variety of cleaning applications.

Uses

Eliminates odors in carpets, upholstery and other porous surfaces from urine, tomcat spray, feces, emesis and more. Works where other products haven't and won't. Contains no enzymes so may be used without loss of efficacy with or after detergents (carpet shampoo) and germicides have been used. Saturate carpet and other porous surface to reach the odor source. Sprays and powders will only treat surface problems. Removes many stains.

Directions for Use

One time odor elimination

For carpet, locate the source of the odor (a black light or moisture probe may help identify urine deposits) and treat after vacuuming loose dirt and debris. Mix concentrates with water at a rate of 1:16 (8 oz per gallon) and saturate 50% beyond the actual "spot" area. For general carpet deodorizing, add Odorcide directly to the cleaning system insuring it penetrates to the odor source. Increase penetration by using a roller, hand manipulation or by "walking" the product in. Extract excess when cleaning or let air dry.

On-going odor elimination

Dilute with water or cleaning solution at a rate of ½ oz per gallon. Apply to litter box areas or cages with mop, sponge, or trigger sprayer. Use higher dilution for more severe odor situations.

Product Safety

All Thornell products are safe for use on any surface. As with any product, follow the label directions. Contains water, proprietary essential oil blend and preservatives.

Keep out of the reach of children. For external use only.

Cautions

Effectiveness decreased when using with Chlorine solutions. Always spot test for color fastness.
