Background

Unpleasant animal-related odors are a common, daily occurrence, and managing them safely and effectively is an important part of keeping your work environment pleasant, your clients satisfied, and pets happy. Thornell specializes in creating products that permanently eliminate malodors - complex blends that work through counteraction, absorption, molecular bonding, inhibitors and residual actions. They are NOT masks. They are NOT enzymes. Each of Thornell's products is specially formulated for a unique purpose.

Uses

Feces, urine, and emesis are just a few of the common odors present in the Animal Zone of the clinic. This includes the kennel and grooming areas and the dog & cat wards. Use K.O.E. and K.O.E. Fresh Scent to eliminate odors on walls and floors and in cages and other large areas of the clinic. Keeping these areas clean and odor-free will ensure that all of your patients are sent home in optimal condition and that the unpleasant odors in the clinic are not going home with them. K.O.E and K.O.E Fresh Scent eliminate odors, they do not mask them. They are not enzymes so they can be mixed with other cleaning solutions without a decrease in efficacy.

Directions for Use

Remove cap from the small, graduated part of the bottle. Squeeze large part of bottle, with cap on, forcing K.O.E. into the measurement chamber.

- Add 1/4 oz. / 7.5 ml to 1 gallon of cleaning solution or rinse water. Same dilution in water may be applied using a plastic lawn/garden type pump-up sprayer.
- For high pressure wash add to detergent tank at the ratio of 1/2 oz. to 6 gal. (1 to 1536).
- Ratios may be varied to suit the needs of the situation or pressure equipment.

Product Safety

All Thornell products are safe for use on any surface or directly on the animal. As with any pet care product, consult with your veterinarian and review and follow the label directions. Contains water, proprietary essential oil blend and preservatives.

Keep out of the reach of children. For external use only.

Cautions

Effectiveness decreased when using with Chlorine solutions.
