

# HOW TO KEEP YOUR FACILITY **SMELLING FRESH** THIS SUMMER WITH K.O.E.®

Eliminate tough pet odors in your facility's animal zones! K.O.E.® and K.O.E.® Fresh Scent neutralize feces, urine, and emesis in kennels and wards. Keep the facility fresh and patients happy!

1

## Measure

Remove the cap from the small, graduated section of the bottle. Squeeze the larger section (cap on) to fill the measuring chamber with K.O.E.®.

2

## General Cleaning

Add 1/4 oz. of K.O.E.® to 1 gallon of cleaning solution or rinse water.

3

## Spray Application

Use the same 1/4 oz. per gallon dilution in a plastic pump sprayer.

4

## High Pressure Wash

Add 1/2 oz. of K.O.E.® to 6 gallons of water in your detergent tank.

5

## Adjust As Needed

Dilution ratios can be adjusted to match specific needs or pressure washing equipment.

Be prepared this summer and try K.O.E.® for yourself! Buy now at [shop.odorcide.com](http://shop.odorcide.com).

### Summer Cleaning Tips:

- Add K.O.E.® to your mopping solution (follow dilution instructions on the bottle) to thoroughly clean floors and neutralize odors.
- Use a K.O.E.® diluted spray to wipe down all surfaces, including exam tables, countertops, and waiting area furniture.
- After cleaning, lightly mist the air with a diluted K.O.E.® solution to eliminate any remaining airborne odors. You can also spray K.O.E.® onto air filters to help neutralize odors as air circulates.
